

BUILDING

Use 20-30 foam pieces,
scissors and shaving cream
to make a building
or structure.

Try cutting some of the
pieces into different shapes.

PHYSICS

Construct a catapult.

1. Stack 11 craft sticks together, secure with rubber bands on each end.
2. Slide a craft stick between the 10th and 11th craft stick.
3. Place another craft stick on the top of the stack; secure one end with a rubber band.
4. Use the other supplies to enhance your catapult if desired.
5. Test your catapult with a marshmallow.

Puzzle & Drawing

Solve the puzzle.

Draw a picture of something
you would love to build one day.

Outdoor Science

Line up 8 popsicle sticks. Glue 2 sticks across them. Turn it over.

Alternate popsicle sticks around the frame once.

Continue alternating popsicle sticks around the outside until you have 4-6 rows, gluing each popsicle stick down as you go.

Use the twine to create a hanger by knotting two 18 inch pieces in the center and then bringing them around the sides and knotting all the ends together.
